

Horses, Riders and Trainers

Love the BEMER VET!

Our friend's horse Florida, BEFORE and AFTER her first BEMER session.

Do you see the difference? She is more relaxed, as shown by her lowered head, decreased muscle tension in her neck, tucked hind leg and half-closed eye. This is a typical response for a healthy horse and means that the horse has gone from the FIGHT&FLIGHT mode to REST & DIGEST mode where the para-sympathetic nervous system is activated.

Scientifically proven, the BEMER VET came out in January 2017, sold out 3 times immediately and was voted most innovative horse device of Europe at the Equitana in Germany. It won the prestigious Red Dot Award Design price. Linda Tellington-Jones, horse trainer, teacher and author of 21 books, is the Ambassador for the BEMER VET and at 81 years of age is a faithful BEMER PRO user herself, so she can travel the world to improve animals and people's lives.

The BEMER VET is lightweight (only 4Lbs) and easy to use horse therapy blanket with a separate applicator for legs or neck that has the coils that transmit the patented BEMER signal woven into the fabric. The battery and control unit are integrated wirelessly and has up to 40 applications per battery charge. It is intuitive and simple to operate with 3 preset programs of 5, 10 or 15 minutes, Yes that's it! No more long hours of heavy therapy blankets. You can give many horses top notch therapy in a short amount of time. The BEMER VET blanket can be sized to each horse with 3 adjustable straps, it is resilient and easy to clean.

**The BEMER VET aids in PREVENTION, THERAPY and PERFORMANCE & RECOVERY
and makes for BALANCED, FOCUSSED HORSES.**
