COVID-19 NOSODE Protocols

This homeopathic remedy can be used in several different ways. ***It is important not to take the remedy routinely or because of anxiety or fear.*** If you take the remedy multiple times when you do not need it, it may not work as well later if you do get the disease.

- (1) **Preventive remedy.** The coronavirus nosode can be taken as a preventive if you know you have been exposed to someone with an active case of COVID 19. Especially if you are a health care worker or taking care of someone with the disease. Take Coronavirus 30c or 200c three times a day for three days or longer if necessary.
- (2) **Early stage remedy.** The coronavirus nosode can be taken at the first sign of symptoms. Fever, dry cough, fatigue and cold and flu like symptoms are seen most often. Take Coronavirus 30c or 200c three times a day for three days or longer if necessary.
- (3) **Intercurrent remedy.** The coronavirus nosode can be taken during the covid-19 infection, when well indicated remedies are not working or when remedies are just palliating the symptoms. Take Coronavirus 30c or 200c three times a day for three days or longer if necessary. Then go back to the indicated homeopathic remedies. (*Bryonia, Gelsemium, Arsenicum, Oscillococcinum, etc.*)
- (4) **Relapsing remedy.** The coronavirus nosode can be taken during the covid-19 infection if there are relapses in the case. Take Coronavirus 30c or 200c three times a day for three days or longer if necessary. Then go back to the indicated homeopathic remedies. (*Bryonia, Gelsemium, Arsenicum, Oscillococcinum, etc.*)
- (5) **Convalescence remedy.** The coronavirus nosode can be taken after the covid-19 infection if there are lingering symptoms. Fatigue, shortness of breath and loss of taste and smell are common residual effects of the virus. Take Coronavirus 30c or 200c three times a day for three days or as long as symptoms persist.
